Education

Polytechnic University of the Philippines Manila, Philippines
Bachelor of Science in Computer Science 2020 – 2024

- Magna Cum Laude
- CHED and Quezon City Youth Development Scholar

Experience

Backend Software Engineer Sept. 2024. – Present
SECURITY BANK CORPORATION Makati, Metro Manila

Tech Stack: Java Microservices, Reactive Spring Boot, GraphQL, Apache Kafka, MongoDB, AWS

- Selected for their **1st Cadetship Program**, completing **a 6-month intensive training** focused on **Java backend** development, microservices architecture, secure banking systems, and production support.
- Deployed to the **Security Bank Mobile Application (SBAPP)** – **Payments & Transfers Squad**, delivering backend development and production support for core digital payment services including **QRPH, InstaPay, PESONet**, and **Prepaid Mobile Reload (PMR),** ensuring high availability and transaction reliability.
- Contributed to the end-to-end development and **production release of PESONet payments**, enabling secure, high-value interbank transfers for mobile banking users.
- Led the development of **Prepaid Mobile Reload (PMR)** as the **primary Point of Contact (POC)**, driving backend implementation, coordinating cross-functional teams, and successfully delivering the feature to production.
- Contributed to the development and rollout of **QRPH P2P payments**, enabling real-time peer-to-peer transactions through **QR-based payment flows**.

Software Engineering Intern Aug. – Sept 2023
BAYTECH BPO CORPORATION Pasig, Metro Manila

Tech Stack: Javascript, NodeJs, Jest, Playwright, Docker

- Collaborated on optimizing the frontend, focusing on user experience and performance.
- Implemented Docker for efficient containerization, enhancing deployment processes.
- Built unit and automation tests with Jest and Playwright, boosting efficiency and reliability.

Technical Skills

Programming Languages: Java, Python, JavaScript, C

Backend & Enterprise Stack: Spring Boot, Spring WebFlux, GraphQL, RestApis, Hibernate, Jakarta EE, Microservices

Messaging & Event Streaming: Apache Kafka, ActiveMQ

Databases: PostgreSQL, MongoDB, MySQL

Cloud & DevOps: Amazon Web Services (AWS), Docker, Argo CD, Datadog, Kibana, Liquibase

Frontend Technologies: React, Vue.js, HTML5, CSS3

Testing & Automation: Jest, JUnit Playwright

Developer Tools: Git, Postman, VS Code, Jupyter Notebook, Google Collab, Android Studio
