Summary

Passionate Computer Science Student @ Polytechnic University of the Philippines, Sta. Mesa Manila with a strong academic record and technical skills in web development and Software Development. I am motivated, detail-oriented, and continually seek to expand my knowledge and skills in the field of technology.

Education

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES
Sta. Mesa, Manila
BS Computer Science
August 2020- Current

- Consistent President Lister
- CHED and Quezon City Scholar

Technical Skills

Areas:
Software Development and Engineering
Programming Languages:
Java, JavaScript, Python, C
Libraries/Frameworks:
React.Js, Vue, Express.Js, Node.Js, Jest.Js, HTML5, CSS3
Database:
MySQL, MongoDB
Tools:
Postman, VsCode, Android Studio, Git, Docker, Playwright

Experiences

BAYTECH BPO CORPORATION
Pasig, Metro Manila
Software Engineer Intern
August 2023- September 2023

- Collaborated on optimizing the frontend, focusing on user experience and performance.
- Developed unit tests using Jest and automation tests with Playwright for improved project efficiency and reliability.
- Implemented Docker for efficient containerization, enhancing deployment processes.

Projects

Some of my Projects in University:

MERN E-Commerce Website for Mechanical Keyboards
A user-friendly e-commerce platform for mechanical keyboards.
•React •Express (Node.js) •MongoDB •Redux React • Styled Components

OpenSource Freedom Wall
A React-based blogsite designed for Computer Science students.
•React •Node.js (Express) •MongoDB •React Hooks •Context API

Detection of GAN- generated images using Spatial-Frequency Fusion Data
A spatial-frequency fusion approach, combining Discrete Wavelet Transform (DWT) and Local Binary Pattern (LBP) for feature extraction. It utilizes a Support Vector Machine (SVM) as a classifier to enhance GAN image detection efficiency. The thesis contributes to advancements in computer vision and digital forensics.
•Python •Local Binary Pattern •Discrete Wavelet Transform •Support Vector Machine
